About

I am a stress resistible, responsible, flexible, critical-thinking, problem-solving and communicative person with a high work ethics. I like challenges and also I like to work in team.

I always open to new knowledge and ready for cooperation.

I think, person to be successful, should learn all his life. On the other hand, there are a lot of things I think I should learn and I would very appreciate to study something new and gain more knowledge in your company and become a good specialist and useful employee.

Backend: Node.js, Express, REST API, MongoDB, MySQL, PostgreSQL, JWT

Tools: Git, Docker, Docker Compose, GitHub Actions, Linux, CI/CD, Netlify

Another: Figma, Agile/Scrum

Work History

Junior Full-stack Developer in AO "Zahist"

July 2023 — February 2024.

As a member of the development team for a CRM application tailored for attorneys, I was deeply involved in various aspects of the project utilizing React, JavaScript, and MongoDB. In adherence to the Scrum methodology, my contributions spanned across different phases:

- Participated in requirements gathering and design development meetings.
- Actively participated in investigating issues and identifying defects in the CRM application to determine root cause of the problem.
- Designed and developed new functionality to block users and track their activities in the database.
- Actively participated in the process of redesigning and improving the backend part of the project.
- I used Ant Design library (antd) to implement the interface, and developed my own styles to complement and adapt Ant Design components according to the project requirements.
