## About

I'm a full-stack developer with two years of experience building web applications. I enjoy working in a team, solving real problems, and writing clean, maintainable code. I take ownership of my work, communicate clearly, and always look for ways to get better at what I do. I'm now looking for a new role where I can grow, learn from others, and contribute to building something useful.

## Skills

Frontend: React (Hooks, Redux, Zustand), Next.js, React Native, Tailwind CSS, Sass, HTML5, CSS3, JavaScript, TypeScript, Vite, Webpack, BEM
Backend: Node.js, Express, REST API, MongoDB, MySQL, PostgreSQL, JWT
Tools: Git, Docker, Docker Compose, GitHub Actions, Linux, CI/CD pipelines, Netlify
Design & Methodologies: Figma, Agile/Scrum

## Work History

### Middle Full-stack Developer in AO "Zahist"
**March 2024 — May 2025**

- Developed and maintained responsive React user interfaces, ensuring smooth functionality and a great user experience across devices and browsers.
- Collaborated with UI/UX designers, QA, and product managers to deliver features aligned with business goals, reducing delivery time by 20%.
- Built and integrated RESTful APIs to enable seamless client-server communication and enhance app functionality.
- Refactored complex React components, optimized state management, and improved code readability and maintainability.
- Applied React best practices and design patterns to reduce technical debt and boost app performance and scalability.
- Implemented JWT-based authentication and data protection protocols, decreasing unauthorized access incidents by 40%.
- Conducted code reviews to maintain high code quality and promptly resolve bugs.
- Created and maintained technical documentation, accelerating onboarding time for new developers by 50%.

### Junior Full-stack Developer at AO "Zahist"
**July 2023 – March 2024**

- Gained foundational experience contributing to the development of a custom CRM system for legal professionals.
- Supported senior developers by handling smaller frontend tasks and writing helper backend functions using React and MongoDB.
- Assisted in identifying root causes of bugs and unexpected behaviors by analyzing the codebase and application logs.
- Observed and learned best practices in software development, including Git workflow, API integration, and team collaboration in Agile/Scrum.
- Customized pre-built Ant Design components to match product specifications and enhance user interface consistency.
- Took initiative to document small tasks and technical findings, helping improve internal communication and knowledge sharing.
